

PRESS RELEASE  
FOR IMMEDIATE RELEASE

## Right Weigh Launches Industry's First Liquid Filled Calibrating Onboard Load Scale

Sherwood, Oregon – Right Weigh, Inc. is announcing its launch of the industry's first liquid filled, calibrating onboard load scales in conjunction with the 36th Annual Mid-America Trucking Show in Louisville, KY (March 22nd - 24th).

This new line of liquid filled onboard load scales allows for flush and fully exposed gauge mounting. Measuring and reading in actual weight (pounds **not** psi) these weather tight analog gauges contain low viscosity silicone that prevents corrosion and absorbs vibration and pressure spikes. The gauge has an operating temperature range of -40°F to 140°F and is vented to prevent altitude and temperature from affecting its accuracy.

Unlike any prior liquid filled gauge on the market, these patented load scales utilize on-the-face calibration for customized accuracy, ensuring accurate weight readings within 250 lbs or better. Available with either a 2½" or 4" dial face, the liquid filled line includes applications for single, tandem and tri-axle configurations.

"Our customers have been asking for these," said Andy Mount, Vice President of Right Weigh, Inc. "We developed this line in direct response to the industry's need for an onboard scale that can be flush mounted without requiring any protective enclosure, but still gives the driver the information needed to stay legal. This gauge does exactly that. Furthermore, we're familiar with the financial pressures that the industry is faced with – we are truly excited to offer such an affordable tool to help reduce operating costs."

This new onboard scale will be introduced for inspection and for purchase at the Mid America Trucking Show in Louisville, Kentucky (March 22-24) at booth #8530, as well as installed on equipment at many trailer manufactures showing at MATS.

**A press conference will be held at MATS for all members of the media on Friday, March 23, at 9:30am in room C108. During the 30-minute conference all details of this new product will be discussed and any questions will be addressed by Right Weigh's founder, Sid Campbell, and Right Weigh's Vice President, Andy Mount.**

### About Right Weigh, Inc.

Right Weigh has been helping drivers maintain safe and legal axle weights with reliable interior and exterior analog load scales for nearly a decade. Right Weigh's patented scales provide accurate, on-the-ground axle weights allowing drivers to know their weight while loading without requiring in-ground scales. Simple to install, calibrate and use, Right Weigh's affordable scales are helping fleets and owner operators alike. As a retro fit or OEM option, Right Weigh Load Scales are available for most air suspension tractor and trailer brands and axle configurations, with complete tractor and trailer sets available for under \$200. All Right Weigh products include a three-year parts warranty. For more information and product images, please call Right Weigh at 888-818-2058 or visit [www.rwls.com](http://www.rwls.com).
